

Update Instructions

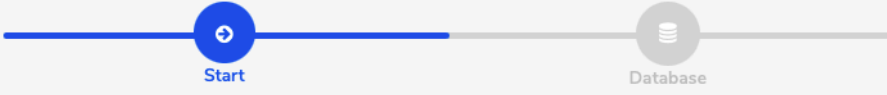

Step 1: Download the latest script and extract it on your pc. Open **mentorship_v1.1 > updates > v1.1 > upload files** folder there you will see **3 zip files** inside this folder, now you need to upload these 3 zip files on your server please follow the below directions carefully.

- **application.zip** > upload path: Goto your project **root folder > application** upload this zip file and extract it inside the **application** folder.
- **assets.zip** > upload path: Goto your project **root folder** upload this zip file inside **assets** folder and extract it
- **config.zip** > upload path: Goto your project **root folder > application > config** upload this zip file in this folder and extract.

Step 2: Open the latest downloaded script and upload this “**updates**” folder on your server project root folder and replace.

Step 3: Open a browser and write a url like this: **www.yourdomain.com/updates/v1.1** you will see a page like below here enter your item purchase code for update this script.
