

Probation Task List – PHP Developer

Link for Scripts and Assets – [Click Here](#)

Objective: To familiarize interns with various web development solutions and tasks related to customization and modification.

Day 1: Project 1 - Mirbnb

- Install Mirbnb solution on localhost.
- Change the logo and color scheme to reflect a unique identity. Replace the image banner with a video banner.
- Record a video demonstration of the modified Mirbnb project.

Day 2: Project 2 - Millow

- Install Millow solution on localhost.
- Change the logo and color scheme to reflect a unique identity. Replace the image banner with a video banner.
- Record a video demonstration of the modified Millow project.

Day 3: Project 3 - MoreX

- Install MoreX solution on localhost.
- Change the logo and color scheme to reflect a unique identity. Replace the image banner with a video banner.
- Record a video demonstration of the modified MoreX project.

Day 4: Project 4 - Myrcrypto

- Install Myrcrypto solution on localhost.
- Change the logo and color scheme to reflect a unique identity. Replace the image banner with a video banner.
- Record a video demonstration of the modified Myrcrypto project.

Day 5: Review and Reflect:

- Interns to review their recorded videos and make notes on challenges faced and solutions applied.
- Discussion session on common issues and solutions among interns.
- Prepare a brief report summarizing experiences and learnings.

Day 6: Presentation:

- Interns to present their modified projects and share insights from their experience.
- Feedback session from mentors and peers.
- Final evaluation and discussion on future tasks and projects.

Note: Each task should be accompanied by documentation outlining steps taken and any challenges encountered. Video recordings should be clear and comprehensive, highlighting modifications made and functionality achieved.
